

JSON EVENT FEED DOCUMENTATION

The JSON API Feed can be accessed from your TicketSocket URL `/api/eventFeed`
The following documentation references what each value represents.

```
[
  {
    "id": "203", //The unique ID of the event

    "onSale": "1", //1 => event is on sale, 0 => event is not on sale

    "cutOff": 1406147400, //UNIX timestamp of the cut off time

    "eventType": "typedTickets", //The event type (all 2.0.0+ events are typedTickets)

    "venue": "Ti4gV2.....bmRlbik=", //base64 encoded venue value

    "notOnSaleText": "This is the Not On Sale Text", //event wide text for not on sale status

    "location": "111 Main St.", //event address line 1

    "location2": "Suite 101", //event address line 2

    "title": "U2NyYW50b24g", //base64 encoded event title

    "start": 1404226800, //UNIX timestamp of the event start

    "end": 1406925000, //UNIX timestamp of the event end

    "description": "PHA+...D4NCg==", //base64 encoded event description (this one has been truncated to fit this file)

    "shortDescription": "This is the short description of event", //base64 encoded short event description, used on the event list

    "sefUrl": "NewYork2014", //The event's unique portion of the SEF URL
  }
]
```

one
